PROFILE

Backend-leaning Full-Stack Developer with hands-on experience designing and building server-side services in Node.js and NestJS, backed by PostgreSQL, REST APIs, and Docker-based deployment. Comfortable owning the backend layer end-to-end — from data modeling and API design to CI/CD pipelines — while also shipping React/Next.js frontends when needed. Track record delivering backend features for fintech, AI-driven, and education platforms, with strong Git-based team workflows and a fast learning curve on new stacks, including AI-assisted development.

EXPERIENCE

EPAM Systems — JavaScript Software Engineer

Apr 2026 – Present | Baku

- Working as a JavaScript Software Engineer on enterprise-scale projects within a global engineering organization, contributing to backend services and APIs.
- Collaborating with cross-functional teams following agile development processes and engineering best practices.

KODAZE LTD — Frontend → Full-Stack Developer

Sep 2024 – Oct 2025 | Baku

- Promoted from Frontend to Full-Stack Developer, taking ownership of backend architecture using Node.js, NestJS, and PostgreSQL.
- Designed and built REST APIs, database schemas, and server-side logic for AI and Fintech applications.
- Set up and maintained Docker containers and CI/CD pipelines to streamline backend deployment and improve scalability.
- Improved backend performance and reliability, supporting production traffic across multiple client-facing apps.

Bridge Spero — Frontend Developer

Sep 2025 – Dec 2025 | Baku

- Led a team of 3 developers building an education platform with Next.js/TypeScript, working closely with backend APIs for authentication and data flows.
- Developed authentication, dashboards, course management, and profile features for teachers and students, integrating with backend services.

OENVA LLC — Frontend Developer

Jun 2024 – Jan 2025 | Baku

- Built responsive web apps with modern frameworks, ensuring performance and scalability for 300+ active users.
- Collaborated with backend developers and designers to integrate REST APIs into user-facing interfaces.

Baku Engineering University — Academic Backend Projects

Dec 2023 – Jun 2025 | Baku

- Built academic coursework projects focused on server-side application logic, relational database design, and backend frameworks.

SKILLS

Backend: Node.js, NestJS, REST API design, WebSockets, server-side architecture

Databases: PostgreSQL, Prisma, relational data modeling

DevOps & Tools: Docker, CI/CD pipelines, Git/GitHub, Webpack, Vite, basic Apache/Nginx

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend (Supporting): React.js, Next.js, Redux Toolkit/RTK Query, Tailwind CSS, Bootstrap, MUI, ShadCN

Forms & Validation: React Hook Form, Yup

Other: GSAP, Three.js

EDUCATION

Bachelor of Information Technology

Baku Engineering University · September 2022 – July 2026

LANGUAGE

Azerbaijani (Native) · Turkish (Advanced) · English – Intermediate (B2) · Russian (Beginner)
